SUMMARY

Backend Developer and Cybersecurity Specialist focused on intrusion detection, automated threat analysis, and high-performance system architecture. Proven ability to architect secure, scalable backends using Node.js, FastAPI while integrating machine learning models for real-time network security. Adept at conducting packet analysis, network sniffing, and geospatial threat visualization using Scapy, XGBoost, and Scikit-learn to identify and mitigate critical system vulnerabilities.

EDUCATION

Haji Jamaluddin Thim Trust Theem College of Engineering

Jul 2023 - Present

- Bachelor of Engineering Information Technology Engineering

Tarapur Vidya Mandir

Jul 2022 - May 2023

- Cleared with 57.33%

C.B Sankhe School

Jun 2021 - May 2022

- Cleared with 76.20%
-

TECHNICAL SKILLS

Languages :Python, Javascript, SQL, HTML/CSS

Frameworks: Node.js, React.js, Scikit-Learn, Pandas, Scapy, Numpy

Tools: Git, Github, Jupyter Notebook, Postman

WORK EXPERIENCE

Intern at Camlin Fine Sciences

DEC 2025 - Jan 2026

- Assisted in monitoring firewall activity and security alerts as part of the security operations team. Observed how network traffic and security logs are reviewed to identify potential threats. Gained basic exposure to cybersecurity monitoring and network security practices during the internship.
-

PROJECTS

Multi-Model Intrusion Detection System

- Engineered a hybrid security framework utilizing Multiple ML models and Scapy for real-time packet analysis and automated threat detection with integrated geospatial visualization of attack origins.

SeatSync

- Architected a production-ready carpooling platform using Node.js, Express, MongoDB, and Socket.io with real-time booking flows, geospatial route matching, JWT authentication, trust scoring, SOS emergency alerts, and an admin dashboard with driver verification and fraud detection.

Ride Demand Analysis

- Developed a predictive analytics engine to forecast urban mobility trends and optimize ride-hailing distribution using machine learning models and large-scale transit datasets.
-

ADDITIONAL INFORMATION

- **Technical Skills:** Cybersecurity, Full-Stack Web Development, Data Science, Machine Learning
- **Languages:** English, Marathi, Hindi
